

Jiuchen Shi

Research interests: cloud native, microservice, regionless

■ **Date of birth:** 1996.08 ■ **Supervisor:** Minyi Guo ■ **Graduate date:** 2024.09
■ **E-mail:** shijiuchen@sjtu.edu.cn ■ **Homepage:** shijiuchen.github.io ■ **Tel:** (+86) 198-2128-8336

Education

2019/09-now	Shanghai Jiao Tong University	Computer Science	Ph.D. Candidate
<ul style="list-style-type: none">• 5 published papers(1st author; CCF-Ax2; CCF-Bx3), 4 co-authored papers (CCF-Ax3; CCF-Bx1), 4 under-review papers(1st author/co-1st author , CCF-Ax2, CCF-Bx2)• Responsible for 2 research projects, participation in 4 research projects• GPA 3.86 (4.0), TA of Advanced Computer Architecture			
2015/09-2019/06	Dalian University of Technology	Software Engineering	Undergraduate
<ul style="list-style-type: none">• Responsible for 1 innovation project for college students, 1 Google collaboration project, 2 published papers;• GPA 4.07 (5.0); Ranking: 8/284 (2.8%)			

Honors & Awards

- Shanghai Jiao Tong University Graduate Special Scholarship (Huatai Securities Technology Scholarship, 2023);
- Shanghai Jiao Tong University Excellent Student (2023);
- National Scholarship for Undergraduate Students (2018);
- Dalian University of Technology Individual Scholarships (First-class Scholarship for Learning, Social Practice Scholarship, Spiritual Civilization Scholarship, etc.);
- Second Prize in Provincial-level China-US Young Maker Competition, Third Prize in Provincial-level Computer Design Competition, Second Prize in City-level Mathematics Competition in Dalian, etc.

Publications

Accepted Publications

- [1] **Jiuchen Shi**, Kaihua Fu, Jiawen Wang, Quan Chen, Deze Zeng, Minyi Guo. Adaptive QoS-aware Microservice Deployment with Excessive Loads via Intra- and Inter-Datacenter Scheduling. Submitted to IEEE Transactions on Parallel and Distributed Systems (TPDS). 2024. **CCF-A. Accept to appear.**

Under-review Papers		
<p>[1] Jiuchen Shi, Jinyuan Chen, Quan Chen, Kaihua Fu, Fanrong Du, Ruogang Ma, Minyi Guo. “Delphinus: Improving Resource Efficiency of Applications with Shared Microservices and Diverse Queries”. Submitted to 2025 European Conference on Computer Systems (EuroSys 25). 2025. CCF-A.</p> <p>[2] Jiuchen Shi, Zhixin Tong, Quan Chen, Kaihua Fu, Liwei Song, Pengfei Huang, Yinuo Li, Minyi Guo. "Holistic Resource Orchestration for Reducing Operation Costs in Geo-distributed Clouds". Submitted to Proceedings of the 15th Symposium on Cloud Computing (SoCC 24), 2024. CCF-B.</p>		
National Patents		
<p>[1] Quan Chen, Minyi Guo, Jiuchen Shi, “Cross-regional Microservice Excessive Load Scheduling System, Method, and Device”, 202210583583.X, Granted.</p> <p>[2] Quan Chen, Minyi Guo, Jiuchen Shi, Zhixin Tong, Hang Zhang, “Dynamic Feature Oriented Microservice Application Resource Management Optimization System and Method”, 202310754097.4, Under review.</p>		
Projects and Internship		
Research Projects		
<ul style="list-style-type: none"> Research on Cloud-Native Runtime System for Heterogeneous Hardware, NSFC of China, 2023-2027, participate. Resource Management for Internet Services in Datacenters, NSFC of China, 2021-2023, participate. Research on Key Technologies of Blockchain-Based Distributed Resource Management, NSFC of China, 2019-2022, participate. Cloud Computing Architecture and Platform for Human-Machine-Object Integration, National Key Research and Development Program of China, 2018-2021, participate. 		
Enterprise Cooperation Projects and Internships		
Optimization of Compute/Network Costs in Regionless	Project leader	2023/02-2024/04
<ul style="list-style-type: none"> Collaborate with Huawei Cloud. Considering the network cost caused by the different positions between data and compute, we decide multi-tenants’ VM request scheduling and the data placement among geo-distributed DCs. The project-related results have been submitted to SC 2024. 		
Resource Reservation under Ultimate Elasticity	Project leader	2021/09-2022/09
<ul style="list-style-type: none"> Collaborate with Huawei Cloud. Under different VM request patterns of large tenants in public cloud, this project orchestrates computing resources among geo-distributed datacenters to reduce deployment costs. In production-level deployment, cost savings of approximately 2.8 million dollars can be achieved. 		
Academic Services		
<ul style="list-style-type: none"> Invited reviewer for Journal of Parallel and Distributed Computing (JPDC)
